SUMMARY

Frontend-focused IT Engineering student building responsive and user-friendly web interfaces.

Strong foundation in HTML, CSS, and JavaScript with practical React-based project experience.

Seeking a Frontend Intern role to ship polished UI features and improve performance and usability.

EDUCATION

Bachelor of Engineering in Information Technology (BE.IT) — NCIT, Pokhara University

Current Semester: 5th | Expected Graduation: 2026

PROJECTS

Sublytics — Co-Founder & Frontend Developer

- Built and iterated a subscription-management product focused on clear UX for tracking recurring payments.
- Developed responsive interface components with reusable UI patterns and modern frontend tooling.
- Organized feature delivery workflow for consistent updates and maintainable frontend architecture.

Personal Portfolio Website — Frontend Project

- Designed and developed a React portfolio with mobile-first layout, smooth navigation, and section-based UX.
- Implemented resume download and contact flow for recruiter-friendly access to profile information.
- Structured components for easier future updates to projects, skills, and personal branding.
